

Weekly Report

Pingping Shang

2013.5.13~2013.5.19

Work in this week

- 1 read papers about hyperslice and response surface.
- 2 survey if we can estimate a new distribution given some related distributions which may be used in the prediction of trade.

Plan for next week

Implement the first step of the scheme discussed this week if possible—finding formulas to model the relationship between parameters and results.
